#6 MASTIC® LOW TO HIGH VELOCITY AIR DUCT SEALANT

Preferred by technicians nationwide for sealing air ducts and crawl spaces in new construction and home weatherization projects. #6 Mastic® is fiber reinforced, environmentally friendly, easily applied by brush, trowel, or palm, and can be sprayed or extruded with proper equipment. Earns LEED Credits.

- Weather Resistant
- Low Odor
- Fiber Reinforced
- Water-Borne & Non-Flammable
- UL Listed
- Color is Cream

#7 MASTIC® LOW TO HIGH VELOCITY AIR DUCT SEALANT

Premium grade air duct sealant that dries quickly, is environmentally friendly, easily applied by brush, trowel, or palm, and can be sprayed or extruded with proper equipment. Earns LEED Credits.

- Weather Resistant
- Low Odor
- Water-Borne & Non-Flammable
- Color is Grey

#8 MASTIC® LOW TO HIGH VELOCITY SHEET METAL AIR DUCT SEALANT

The best choice for sealing high velocity sheet metal air ducts in apartments, auditoriums, condominiums, hospitals, hotels, large retail stores, military buildings, prisons, schools, and sports complexes. Environmentally friendly, easily applied by brush, trowel, or palm, and can be sprayed or extruded with proper equipment. Earns LEED Credits.

- Low Odor
- Water-Borne & Non-Flammable
- UL Listed
- Earns LEED Credits
- Weather Resistant
- Color is Grey

#9 MASTIC® LOW TO HIGH VELOCITY AIR DUCT SEALANT

Preferred by technicians nationwide for sealing rigid fiberglass duct board systems. Environmentally friendly, easily applied by brush, trowel, or palm, and can be sprayed or extruded with proper equipment. Earns LEED Credits.

- Weather Resistant
- Low Odor
- Water-Borne
- Non-Flammable
- UL Listed
- Color is White

#10 MASTIC® LOW TO HIGH VELOCITY AIR DUCT SEALANT

Fiber reinforced, environmentally friendly, easily applied by brush, trowel, or palm, and can be sprayed or extruded with proper equipment. Earns LEED Credits.

- Weather Resistant
- Fiber Reinforced
- UL Listed
- Low Odor
- Water-Borne & Non-Flammable
- Color is Tan

#15 WEATHER BARRIER COATING®

A bright white coating for protecting air ducts and thermal insulation exposed to the weather. Its 80% Solar Reflectance Value reduces the heat gain of surfaces exposed to direct sunlight. Environmentally friendly, easily applied by brush, roll, or spray equipment. Earns LEED Credits.

- Brush, Roll or Spray
- Weather Resistant
- Water-Borne & Non-Flammable
- Low Odor
- UV Resistant
- Color is Bright White

FIN & PLENUM BRUSH™

Long reach brush that is 18" long with a 2" wide natural bristle head. Every HVAC technician needs two brushes in their service truck.

#52 SPRAY ADHESIVE®

Bonds insulation to galvanized & aluminum sheet metal. Adjustable spray nozzle & wide web spray pattern provides greater coverage in less time. Every HVAC technician needs a can in their service truck.

GLASSCOAT®

Adhesive backed fiberglass scrim or mesh that reinforces the joints & seams of air ducts. White; 3" x 180' rolls; individually wrapped & labeled.
